

Medical & Dental

JOHNSON O'CONNOR STREAMLINES COMPLEX ACCOUNTING REQUIREMENTS FOR HEALTHCARE PROVIDERS

We understand that the unique challenges of managing day-to-day accounting tasks, complying with strict regulations, and managing business growth are especially challenging for the healthcare industry. That's why we take a personal, people-centered approach to helping medical and dental groups streamline complex accounting requirements so doctors, dentists, and other healthcare professionals can concentrate on patient care – not the books.

Providing accounting, tax, and business consulting services for physician and dental groups around Greater Boston and New England has long been a specialty at Johnson O'Connor. In addition, we specialize in services for healthcare practices that focus on contract negotiations, compensation models, and acquisition modeling.

Our professionals also have deep experience developing strategies and services for:

- Financial reporting and analysis
- Regulatory compliance
- Risk assessments
- Tax planning and preparation
- Employee benefit plan services
- Wealth management for individual physicians
- Integration of accounting technology systems
